

Having K-Love available in my area is a huge benefit to my community. There is Un-told amounts of stress due to our community being near Fort Hood, and many of our neighbors and friends are deployed. There is no way to count the number of people who have had STRESS REDUCED in their lives by something they hear on K-LOVE.

As a person who has to drive on the same roads, and shop in the same stores as these persons, I feel comforted in knowing that any item to help to help reduce stress may indeed help me. Will we ever know if someone was going to "go-postal" at my local grocery store? Perhaps they were overcome with stress, and instead of doing some harm to others, they were calmed by something they heard on K-Love.

To you, in any other city, in any other office, this may appear un-realistic, to me, who has witnessed such an event in this community, it is realistic. Thank you
